ABOUT

I started my career as a Graphic Designer during my time studying at UFRJ. While eager to learn more, at the end of my studies, I decided to embark on a new journey, taking a full turn to coding. I began studying by myself, and as I was falling in love with code, I made the decision to join the Le Wagon coding bootcamp, from where I came out fulfilled and confident to say that I'm a Full-Stack Web Developer.
Amateur illustrator for fun, and experienced with social & digital media work. I'm a geek, gamer, coffee lover, passionate about music, and a big trending topics follower.
Communicative and diplomatic, I believe that most problems can be solved through open discussions and good management, as communication is a team's key to sucess.

MAIN SKILLS

HTML5
CSS3
JavaScript
Ruby
Ruby on Rails

Git
PostgreSQL
API Integration
ReactJS (beginner)
(& more)

EXPERIENCE

INDIE WEBDEVELOPMENT & FREELANCE WORK

Jan 2020 - Now

- Development of webpages and apps since the beginning of Le Wagon bootcamp. Through the use of Ruby on Rails full-stack, I managed to deploy projects while still learning Rails, as well as post-bootcamp work. I've also done projects in Laravel while working with Suavy's team. You can check my work at my official webpage.

EDITORIAL & GRAPHIC DESIGN INTERNSHIP

Ediouro Publicações | Dec 2018 - Dec 2019

- Editorial and graphic designer at one of the most sucessful publishing companies from Brazil, working with a diverse team of people to create, edit and publish magazines and books. From regular day-to-day Adobe software work to photographic production, I improved, developed and acquired a great set of skills while working there.
